## DM1 & DM2 Disposable Media Retaining Frames

The Airsan DM Series of disposable media retaining frames has been designed to meet the need for a low cost frame without sacrificing durability. The frame is 24 gauge galvanized steel. The discharge side is 14 gauge 2x4 galvanized wire cloth for low-pressure drop. The 11 gauge steel retaining ring is hinged for easy access to filter pads. And there are **NO EXPOSED WIRE ENDS** –an important safety factor!
